Data Sheet Issue 00/01

Please note a 'kit' comprises of steel fabrication work only. i.e. no undergear.
General Purpose Trailer Kits normally supplied with single mudguards

New

Lighting pods available to suit
General Purpose Trailers

APPLICATION

General Purpose Trailer Kits are available in four sizes 6' x 4' (1830 x 1220mm), 8' x 4' (2440 x 1220mm), 9' x 4' 6" (2745 x 1370mm), and 10' x 5' (3050 x 1525mm) (all internal measurements) with a maximum gross weight capacity of 750kgs for unbraked and 2500kgs for braked applications. These strongly constructed chassis kits are supplied as a bolt together kit that can be easily and quickly assembled.

Each Kit has 2 side panels, 1 front panel, 1 opening rear panel, 1 A-frame and 1 cross member. A drop tailgate and rope hooks are included with a ladder rack and extended rear tailgate/ramp as optional extras. All parts are made of heavy gauge material with a galvanised finish.

All Kits can be fitted with Peakride or Bramberide rubber suspension axles which have excellent ride characteristics and can be galvanised if required. The 6' x 4' is predrilled to accept a single axle and others are predrilled allowing for either twin or single axle application. All are supplied without a floor to enable the customer to choose an appropriate material to suit the purpose for which the trailer is to be used.

The new design of the rear of the trailer incorporates side mounting plates which allow purpose designed lighting pods to be attached. (See insert above) These are pre-assembled, greatly improve the appearance of the trailer and are available as another optional extra.

The majority of these Kits are used with 10" and 13" wheels and tyres but in some circumstances other combinations are available.

Please ask our Technical Department for assistance.
